

Muhammad Umer Hammad

Greencastle, Indiana, 46135 • (765) 712-3905 • [Email](#) • [LinkedIn](#) • [Portfolio](#) • [Github](#)

EDUCATION

DePauw University (Bachelor's in Computer Science & Mathematics) **Expected Grad. Date: May 2028**

Cumulative GPA: 3.90 | Minor(s): Data Science

Awards/Certifications: [AWS Certified Cloud Practitioner](#), **Google** AI Developer Fundamentals, **IBM** Python for Data Science, DePauw Distinguished Scholar, **4x** Dean's List, President's List, **WICS** Hackathon Winner '25, CS Honorary Society

TECHNICAL SKILLS

Programming: Java, Python, C/C++, Swift, Kotlin, JavaScript, HTML/CSS, Lua

Software & Tools: React, Node.js, Express.js, Spring Boot, Bootstrap, UIKit, Xcode, Electron, MongoDB, Firebase, SQL

Frameworks & Platforms: AWS, Google Cloud Platform, Tableau, Figma, Git/GitHub, Jira, Docker, scikit-learn, SHAP

Algorithms & Systems: Data Structures, Recursive Algorithms, Dynamic Programming, Object-Oriented Design

WORK EXPERIENCE

Tenzer Technologies - Software Engineer Intern | Greencastle, IN **May 2026 - Present**

- Cut data mismatches **15%** by building **13** REST endpoints in Java/Spring Boot syncing account data across services
- Reduced deployment time **19%** by automating build and testing stages of the **CI/CD** pipeline across 3+ Agile sprints

DePauw University - Undergraduate Research Assistant | Greencastle, IN **Jan 2026 - April 2026**

- Achieved **0.85 ROC-AUC** predicting customer churn across 7,043 records, via ML pipeline with stratified 5-fold CV
- Quantified **\$242K** revenue-at-risk by applying SHAP to flag tenure, contract, and dependents as top churn drivers

Roblox Headquarters - Game Development Instructor | San Mateo, CA **June 2025 - Sept 2025**

- Enabled **35+** students to ship games to live Roblox servers by teaching Lua scripting, Roblox Studio, and UI systems
- Gained hands-on exposure to **Cube**, Roblox's 3D-generation AI model, supporting engineers on game-design tools

IdTech Camps - Lead SWE Instructor | Cincinnati, Ohio **April 2025 - June 2025**

- Earned **90+** rating instructing **140** students across **10+** workshops in Java, web development, and software design
- Delivered **100%** student project completion rate, building personal websites and functional programs each week

PROJECTS

Open Policy Agent (OPA) Contributor (Jul 2026 - Present): [\[Project Link\]](#)

- Verified **10+** Rego test cases merging a data structure utility and **JWT verification** builtin into OPA's Java SDK
- Validated **18** signing scenarios with **zero regressions** merging an **AWS SigV4** request signing implementation

MindFirst (Oct 2025 - Present): [\[Project Link\]](#)

- Built a **JavaScript** Chrome extension with the **Anthropic API** to classify prompts and gate AI access for users
- Developed a **Mac** menu bar app in **Electron** tracking session-based AI usage time and analytics across AI tools

iOS Crypto Tracker (Feb 2026): [\[Project Link\]](#)

- Built a **Swift/UIKit** app using **CoinGecko** REST API with **URLSession/Codable** for real-time crypto tracking
- Implemented **Timer** scheduling, error handling, and live **BTC/ETH** price display across **4** conversion labels

AWS Push Notifications (Dec 2025 - Jan 2026): [\[Project Link\]](#)

- Built an **Android** notification pipeline using **AWS SNS**, **Lambda**, and **Firebase FCM** for real-time delivery
- Implemented **FCM** token registration, **SNS** subscriptions, and **Node.js Lambda** handler for notification dispatch

LEADERSHIP EXPERIENCE

DePauw Housing & Residence Life - Resident Assistant | Greencastle, IN **March 2025 - Present**

- Mentored **180+** incoming freshman students through pre-arrival, visa, and cultural adjustment processes
- Hosted orientation events and provided 1:1 support to students from **29+** countries helping them navigate college

Google Developers Group - Tech Lead | Greencastle, IN **Oct 2024 - May 2025**

- Built cloud-based student apps using Google Cloud Platform and **Docker** to support scalable deployment workflows
- Managed open-source project collaboration using **CI/CD** pipelines, code reviews, and version control best practices
